

Jordan Max

Chicago, IL 60605 | 847-721-8628 | jordan@jordanmax.net

Summary

Full stack developer with a **proven record of adapting to unfamiliar or unusual problems and solving them with innovative solutions**. Jordan offers 2.5 years of experience in full stack web development using **.NET, MVC, SQL, Web Forms, LINQ, jQuery, HTML, and CSS**. Strong knowledge in developing and designing full stack responsive solutions using **Object Oriented Programming (OOP), AJAX, MVC, Bootstrap, Semantic UI, and JSON**. Took on projects in **Xamarin** which is a cross platform mobile app development framework that allows native level code to be written in C# and will (for the most part) work on all platforms. Proven ability to work with other parts of the team to streamline development process. Excellent working knowledge and thorough exposure on cross browser testing with browsers like: Safari, Google Chrome, and Mozilla Firefox. As a part of self learning have worked on a couple proof of concept using new emerging technologies such as: **ReactJS, AngularJS (1), Grunt**, and more.

Experience

Full Stack Engineer/Lead Xamarin Developer
Newser, LLC — Chicago, IL

Jun 2016 to Jun 2017

- Developed mobile user interface using jQuery, Javascript, HTML5, and CSS3.
- Responsibilities included improving, implemented new features and maintaining existing application.
- Implemented code to fetch data from web services using **jQuery** and **AJAX via JSON**.
- Developed cross browser pages using CSS3, HTML5, Javascript and jQuery.
- Lead the entire mobile application development using **Xamarin** to develop a new **iOS** and was able to get a working **Android** app in a matter of days using the same code.
- Shipped a completely new iOS app in 5 months as the only developer.
- Updated existing code while optimizing deficiencies and improved performance by 50%.
- Created additional revenue via mobile application by implementing **Facebook Ad Network** and **RevMob** into the app which resulted in \$20K annual revenue increase.
- Technologies used: **ASP.NET 4.6, MSQL, Web Forms, Xamarin Forms/iOS, Azure, TFS, jQuery, HTML5, CSS3, SQL Management Studio**.

Full Stack Developer

Feb 2015 to May 2016

NextCrew — Glenview, IL

- Revamped old web application to a newer responsive one using **Semantic UI, Bootstrap, jQuery, Javascript, HTML5, and CSS3**.
- Responsibilities included improving, implemented new features and maintaining existing application.

- Developed communication between application and API using **jQuery** and **AJAX** with **JSON** responses.
- Developed SQL statement to get fetch data and implemented pagination.
- Lead mobile developer - designed, developed and deployed hybrid **iOS/Android** app using the **Cordova** framework.
- Lead a .NET project which communicated with **Quickbooks Online** endpoints to streamline our clients accounting needs.
- Developed user facing application for clients to send data to **Quickbooks Online** endpoints, while also communicating with our database simultaneously.
- Technologies used: **ASP.NET, Web Forms, Cordova, MSQL, TFS, RactiveJS, Semantic UI, Bootstrap, JIRA, Xcode 9**

Education

Columbia College Chicago

May 2015

BA - Mobile and Software Programming

- Data structures, database design, mobile programming and web application development.
- 3.5 GPA and 'Deans List' recipient.
- Completed various personal and team-based projects such as: Sweets Complete (in both: PHP & ASP.NET MVC 5 using Entity Frameworks), Spark Help (ASP.NET MVC5 using Entity Frameworks), Hamstar (Unity3D, C#, Javascript), Procedural AI pathfinding node generation algorithm (C#)
